Blowout Overs

0 plays · 0u · $0

When the spread is over 30, bet the Over. Books price the favorite right but underrate the underdog: backups on both sides and garbage-time drives add points the market doesn't expect. The bigger the spread, the better overs have done (14–21 pts −7% ROI · 30–40 +6% · 40+ +10%). The only trend that passed our luck test across 1,192 strategies.

763-592-11 since 2011 (+7.4% ROI) · **116-88-1** in 2025–26 (+8.5%, +17.5u)

No blowout games at a playable price.

Weather Desk

Outdoor games with steady 15+ mph wind or rain in 3+ of the 8 hours around kickoff (hourly forecast). Two weather systems on one game stack to a bigger stake.

No steady wind or rain games at a playable price this week.

Oddball Matchup of the Week

Ole Miss @ Oklahoma: the game the ground stop pushed to Sunday

Sunday 1:00 PM ET · Norman, OK · OU -2.5 · total 49.5 (DraftKings)

Friday's nationwide FAA ground stop kept Ole Miss from leaving Oxford, and the SEC moved the game to Sunday over the school's objection. The new kickoff lands on a soaking day in Norman: about 10 mm of rain through the morning and showers during the game, mid-40s.

> **DID YOU KNOW**
> It was the first nationwide FAA ground stop since January 2023. Nine games on this slate moved. This total has already fallen from 53.5 at the open to 49.5, and Pinnacle has the under juiced to -116.

Model take: fair total 50.4 (it likes the over), while the steady-rain system says under. They cancel out, and both sides are priced worse than Pinnacle: no play. Under 49.5 only at -111 or better.

How to read this card. Model = our prediction model's edge at the listed price. System = a betting rule with a 15-season record. Situational = a game spot tested against 15 seasons of closing lines. Stakes grow when independent signals agree (max 2u). 1 unit = $10. Lines move: check the price before betting; if it moves past the listed number the edge can disappear.
