MODEL

- **The spot:** The model projects **54.9** points against a 52.5 total (market-blended fair total 53.9). QBs: Caleb Williams / Michael Penix Jr.. Wins about **55%** by our numbers; 52.4% needed at -110.
- **QB check:** Caleb Williams (CHI) is questionable. If he's ruled out at inactives (90 minutes before kickoff), this total drops: skip the bet unless you still get this number.

WIND UNDER

- **The spot:** Kickoff forecast: **12 mph wind, 77°F**. Wind cuts into passing and kicking, and totals historically don't drop enough (unders +12% ROI in 12–20 mph wind since 2011). Cooled off in 2025, so half stake.
- **QB check:** Jalon Daniels (TB) is new starter. If he's ruled out at inactives (90 minutes before kickoff), this total drops: skip the bet unless you still get this number.
- **System · Wind under (Moderate):** Outdoor games with 12-20 mph forecast wind: passing and kicking suffer and totals don't drop enough. Strong long-term record but cooled off in 2025, and the backtest used actual wind while you bet the forecast. Probable edge, not proven: half stakes. Record 329-240-6 since 2011 (+12.3% ROI); 17-19-0 in 2025-26 (-9.4%).

ARI @ LA · Sun 10/18 · 4:05 PM ET

BUY-LOW UNDERDOG

- **The spot:** ARI has missed the spread by about **6 pts** a game lately (smoothed), the kind of slump the market overreacts to. The underdog here gets that inflated number.
- **System · Buy-low underdog (Moderate):** Take the underdog when the road team has been failing to cover lately (smoothed cover margin -4 or worse). The market over-corrects on teams that keep missing the number. +7.3% ROI since 2011 (8 of 14 seasons up), +15% in 2025-26. Weak signal (t = 1.4): half stakes. Record 224-180-13 since 2011 (+7.2% ROI); 21-14-2 in 2025-26 (+13.6%).

PLAYER PROPS

How these are picked. Each player's projection comes from his own games, usage, the defense he faces, his team's expected points and the weather, tested on 23,883 player-games from 2022–26 it never saw. There's no free history of prop lines, so props can't be backtested for profit like sides: the book's price gets 60% of the say, and a prop only plays when the player's own season agrees and there's no injury, role change or QB question. **0.5u max.** The pattern behind the unders: players finish under their own season average more often than over (receiving yards 58%, rushing yards 57.5%, receptions 56% of games since 2022), because a few big games pull the average up.

ODDBALL MATCHUP OF THE WEEK

Ravens @ Cowboys ... in Rio de Janeiro

Maracanã Stadium, Rio de Janeiro · BAL -3.5 · total 53.5 (DraftKings)

America's Team gives up a home game to play in the stadium that hosted the 1950 and 2014 World Cup finals. It's the NFL's first game in Rio and its third straight season in Brazil, after two São Paulo openers.

> DID YOU KNOW
>
> Both previous NFL games in Brazil went over the total: Eagles 34, Packers 29 in 2024 (63 points vs a 49.5 total) and Chargers 27, Chiefs 21 in 2025 (48 vs 47.5). At 53.5, this one has the highest total on this week's board.

Model take: fair line BAL -3.6, fair total 54.2. Right on the number, so no bet. Just a fun one to watch.

How to read this card. Model = our prediction model's edge at the listed price. System = a betting rule with a 15-season record. Situational = a game spot tested against 15 seasons of closing lines.
