SHARP PRICES

How the sharp check works. Pinnacle takes the biggest bets at the lowest margins, so its prices with the margin removed are the best public read on the true odds. Every FanDuel and DraftKings price is checked against them; where the lines differ, half points are valued by how often games land exactly on each number (3, 7, 41, 44…). A price that pays more than the true odds is a **sharp price** bet, whichever side it is on. Every other bet on this card was checked too: a model-only bet the sharp market doesn't back gets cut, and a system bet is cut when the sharp market leans the other way or our price is 2%+ worse than the fair price.

Scanned 168 main-market prices across 14 games (14 with Pinnacle), plus player props. No price edges right now: FanDuel and DraftKings are sitting on Pinnacle's numbers. Edges mostly show up earlier in the week and right after news, so check again before kickoff.

- **LV @ SF Under 51.5** -102 DraftKings: kept, +0.1% against Pinnacle (fair -102)
- **ARI @ SEA** Model (total, under): cut, Pinnacle makes it 50.2% (fair -101), -3.3% at -108
- **CIN @ ATL** Close road team (spread, away): cut, Pinnacle makes it 48.5% (fair +106), -2.9% at +100
- **GB @ NE** Close road team (spread, away): cut, Pinnacle makes it 47.6% (fair +110), -6.4% at -105
- **GB @ NE** Close road team ML (ml, away): cut, Pinnacle makes it 38.6% (fair +159), -3.6% at +150

FIRST HALF

How first-half bets qualify. Free data has no archive of first-half lines, so each season's 1H line is estimated from earlier seasons (about 0.51× the game total, 0.57× the spread). Ten first-half ideas were tested at −110, each against a stricter bar (t ≥ 2, profitable in 2012–18 and 2019+, not losing in 2025–26). Passed: **1H primetime under**: 475-363-22 (+8.0%), 54-36-0 in 2025–26. A play needs the real FanDuel/DraftKings 1H number at or above our estimate and a price within 2% of Pinnacle's fair price. **0.5u.**

No first-half bet qualifies this week.

- **BUF @ MIN 1H Under 22.5**: passed, the price is -4.3% against Pinnacle (50.1% at 22.5 -110).
- **TB @ CHI 1H Under 23.5**: passed, the real 1H line (23.5) is past our estimate (24).

TEASERS

Why teasers. 43.1% of NFL games end with a margin of 3 to 8, so teasing an underdog of +1.5 to +2.5 up six points (to +7.5 / +8.5) crosses both 3 and 7. Since 2011 those legs won **77.4%** of 500 times in games with a total of 49 or less; a two-team 6-point teaser at -120 needs 73.9%. Above break-even in 13/16 seasons, 77.2% on 219 since 2022 (about +9.8% per teaser at -120). The favorite version won only 72.6% (not bet), and dog legs in higher-scoring games only 69.2%. **0.5u per teaser; take it at -130 or better.**

Fewer than two qualifying legs this week, so no teaser.

- **CAR +2.5 → +8.5** (DEN @ CAR, total 44.5)

PLAYER PROPS

How these are picked. Each player's projection comes from his own games, usage, the defense he faces, his team's expected points and the weather, tested on 24,711 player-games from 2022–26 it never saw. There's no free history of prop lines, so props can't be backtested for profit like sides: the book's price gets 60% of the say, and a prop only plays when the player's own season agrees, there's no injury, role change or QB question, and, where Pinnacle (the sharp market) has the prop, our price is within 1% of its fair odds. **0.5u max.** Why the model leans under: players finish under their own season average more often than over (receiving yards 58.1%, rushing yards 57.6%, receptions 56% of games since 2022), because a few big games pull the average up. Books know it too, so an under has to pass the same sharp check as an over.

WEATHER SPOTS

Kickoff forecasts for every outdoor game. Full-game wind unders were retired: they won 305-211 through 2023 but went 38-41 since 2024 as books started pricing wind in. First-half wind unders still hold (45-34 since 2024) but haven't cleared our bar overall, so they're a watch list, not a bet.

No weather spot this week: no game forecast at 12+ mph (windiest: NYG @ PHI, 11 mph) and no rain at kickoff.

How to read this card. Model = our prediction model's edge at the listed price. System = a betting rule with a 15-season record. Situational = a game spot tested against 15 seasons of closing lines. Stakes grow when independent signals agree (max 2u). 1 unit = $10. Lines move: check the price before betting; if it moves past the listed number the edge can disappear.
