Blowout Overs

1 play · 1u · $10

When the spread is over 30, bet the Over. Books price the favorite right but underrate the underdog: backups on both sides and garbage-time drives add points the market doesn't expect. The bigger the spread, the better overs have done (14–21 pts −7% ROI · 30–40 +6% · 40+ +10%). The only trend that passed our luck test across 1,192 strategies.

RESTED HOME TEAM | REST EDGE | MODEL LEANS SAME WAY

- **System · Rested home team (Weak):** Home team with 3+ more days of rest, when the line has moved 3+ points toward them versus our market ratings. Profitable in 11 of 14 seasons, but a small sample (t = 1.3) and mostly big home favorites: half stakes. College moneylines can't be backtested (no historical prices in the free data), so there's no college moneyline system. Record 157-122-3 since 2011 (+7.4% ROI); 14-11-0 in 2025-26 (+6.9%).
- **Situational · Rest edge (Weak):** Oklahoma State has 6 more days of rest; line moved 6.0 its way. Home team with 3+ more days of rest, and the line has moved 3+ points its way. Record 148-115-2 vs the closing number since 2011 (+7.4% ROI, profitable 10/15 seasons; 12-9-0 in 2025-26); -2.9% when our model agreed (114 bets).
- **Model leans the same way:** On its own the model has this side at about 50%, not enough to bet by itself, but it points the same direction (angles won more often when it did).
