Blowout Overs

1 play · 1u · $10

When the spread is over 30, bet the Over. Books price the favorite right but underrate the underdog: backups on both sides and garbage-time drives add points the market doesn't expect. The bigger the spread, the better overs have done (14–21 pts −7% ROI · 30–40 +6% · 40+ +10%). The only trend that passed our luck test across 1,192 strategies.

Outdoor games with steady 15+ mph wind or rain in 3+ of the 8 hours around kickoff (hourly forecast). Two weather systems on one game stack to a bigger stake.

Matchup			Why this one	Play
#10 LSU 4-1 @ **Kentucky** 4-1 Sat 10/10 · 7:00 PM ET	16 MPH WIND	3/8 WET HRS	Forecast: wind averaging **16 mph**, rain in **3 of the 8 hours** around the game, 60°F at kickoff. At 50.5, the total hasn't dropped enough: wind like this knocks down deep balls and field goals and a wet ball means fumbles and more running. Wind **and** rain: two separate weather systems agree. RESTED HOME TEAM | REST EDGE | MODEL LEANS SAME WAY

- **System · Rested home team (Weak):** Home team with 3+ more days of rest, when the line has moved 3+ points toward them versus our market ratings. Profitable in 11 of 14 seasons, but a small sample (t = 1.3) and mostly big home favorites: half stakes. College moneylines can't be backtested (no historical prices in the free data), so there's no college moneyline system. Record 157-122-3 since 2011 (+7.4% ROI); 14-11-0 in 2025-26 (+6.9%).
- **Situational · Rest edge (Weak):** Oklahoma State has 6 more days of rest; line moved 5.9 its way. Home team with 3+ more days of rest, and the line has moved 3+ points its way. Record 148-115-2 vs the closing number since 2011 (+7.4% ROI, profitable 10/15 seasons; 12-9-0 in 2025-26); -2.9% when our model agreed (114 bets).
- **Model leans the same way:** On its own the model has this side at about 50%, not enough to bet by itself, but it points the same direction (angles won more often when it did).

OVER-STREAK FADE | MODEL LEANS SAME WAY

- **The spot:** Georgia has gone over in 3 of its last 3 and Alabama in 3 of 3. Recent shootouts inflate the total (51.5); our model likes the under too.
- **System · Over-streak fade (Weak):** Both teams have gone over in most of their last 3 games (5 or 6 of the 6). Recent shootouts push the total up more than they should. Small edge (t = 1.0), so it only plays when our model also likes the under. Record 434-367-11 since 2011 (+3.4% ROI); 47-39-0 in 2025-26 (+4.3%).

Oddball Matchup of the Week

Bucknell @ Pitt: a 52.5-point spread

Saturday · Acrisure Stadium, Pittsburgh · PITT -52.5 · total 63.5 (DraftKings)

The biggest spread on this week's board: a Patriot League FCS program visiting an ACC team. At 52.5 points, the market is asking Pitt to win by more than seven touchdowns and change.

> **DID YOU KNOW**
> Since 2010 there have been 100 college games with a spread of 50+ points. The favorite covered only 42% of the time, but the underdog was shut out in 30% of them. The biggest this season: Miami -59.5 vs Florida A&M (Miami won 77–7).

Model take: fair line PITT -52.3, fair total 63.7. The Over 63.5 is also on this week's Blowout Overs list.

How to read this card. Model = our prediction model's edge at the listed price. System = a betting rule with a 15-season record. Situational = a game spot tested against 15 seasons of closing lines.
